C4V and Omega Seiki sign a supply lines contract for 1.16 Gigawatt Hours of Lithium-Ion Battery cells over 5 years

C4V and Omega Seiki India Sign Li-ion Battery Supply Line Contract for Electric Mobility Market.

17th August, 2021, India based Electric Vehicle manufacturer, Omega Seiki, has signed a Supply Line Contract with C4V for over 1.16 Gigawatt Hours of Lithium Ion Batteries that will power Omega Seiki's lineup of Electric Vehicles.

C4V is a US based technology company at the forefront of the lithium ion battery innovation ecosystem deploying their technology via global, strategic manufacturing joint ventures. The company's core technology eliminates the need for Cobalt and Nickel enabling a high performing, cost effective, safe and environmentally friendly Energy Storage solution. C4V is currently part of iM3NY and iM3TSV two Gigafactories being set up in New York USA and Townsville Australia respectively. Part of this contract is also expected to be fulfilled by iM3NY.

Omega Seiki Mobility is an Indian electric vehicle manufacturer that is developing its own line of commercial EVs primarily deployed for last-mile delivery. Headquartered in New Delhi, India, Omega Seiki serves as a separate business auto vertical of the Anglian Omega Group. The company's first vehicle - Rage+, was indigenously designed and developed in its manufacturing facility in Faridabad, Haryana. Launched in February 2020 at the Auto Expo 2020, Rage+ is claimed to be India's first smart electric cargo three-wheeler. Recently, the company also unveiled a refrigerated vehicle - Rage+ Frost that will assist in delivery of food and pharmaceuticals, particularly the COVID-19 vaccine.

“We are pleased and honored to provide Omega Seiki with a Supply Line of our best in class technology that will power their high quality Electric Vehicles for years to come” said **Clifford Olin, C4V Chief Business Development Officer.**

“C4V has recently signed a 4015cr MOU with the Karnataka Government providing further evidence of our strong commitment to support domestic manufacturing of Lithium Ion Battery Cells in India”, said **Kuldeep Gupta, C4V VP of strategic partnerships.**

Mr. Uday Narang, Founder, Omega Seiki Mobility said “We are excited to enter into a long-term supply agreement with our partner C4V. With this association we will not only be able to deliver the latest battery technology but also help us in reducing the cost of battery thus our vehicles. Besides, C4V's upcoming facility in India will also help us increase our levels of indigenisation even further. I am sure Omega Seiki Mobility is all set to revolutionise the India electric vehicle market with these new C4V batteries.”

Mr. Deb Mukherji, Managing Director, Omega Seiki Mobility said “With sustainability at the heart of our strategy and an increasingly important requirement for our customers and consumers, we are delighted to be working with our partners to deliver the best technology via our products to the market. The Cutting-edge lithium batteries of C4V will not only provide a solution to range anxiety but will also be value for money to our customers due to their long life and reliability. We hope to have a long and mutually beneficial business relationship with C4V”
